MCNEILLY LIAM MCNEILLY LIAM MCNEILLY

ABOUT

Racing is very much in the McNeilly blood, with Father Paul involved in both his career and the running of the successful Fox Motorsport team. Based in Brentwood, Essex, Liam started racing karts when he was just seven years of age at Rye House in the Honda Cadet class, progressing up to Mini X30 and Junior X30 competing in the IATME Euro and Benelux series at circuits across Europe. In 2019 he finished fourth in the IAME Benelux Championship.

In 2020, it was a case of karting to cars, and a building season of racing in the Ginetta Junior Championship, with a best result was fourth rookie at Knockhill, Scotland. 2021 brought success with five race wins and 15 podiums en route to second in the championship and the Ginetta Junior Winter Series.

2022 was always going to be Liam's final season in the Ginetta Junior Championship, with long term aspirations of competing in both single seaters as well as in GT3 equipment as a professional racer. The second half of the season has been strong for the young racer with three-straight second positions putting him into championship contention ahead of the winter break.

For the 2023 campaign, Liam aims to compete in GB4, a single-seaters series supporting the prestigious British GT Championship and remains part of the Team UK Futures programme, supported by Motorsport UK to provide drivers with exceptional potential.

LIAM'S 2023 RACE PROGRAMME

INTRODUCING THE GB4 CHAMPIONSHIP PARTNERED BY THE BRDC

GB4 races alongside the British GT Championship at the majority of its events, forming one of the most prestigious and best supported packages in British motorsport.

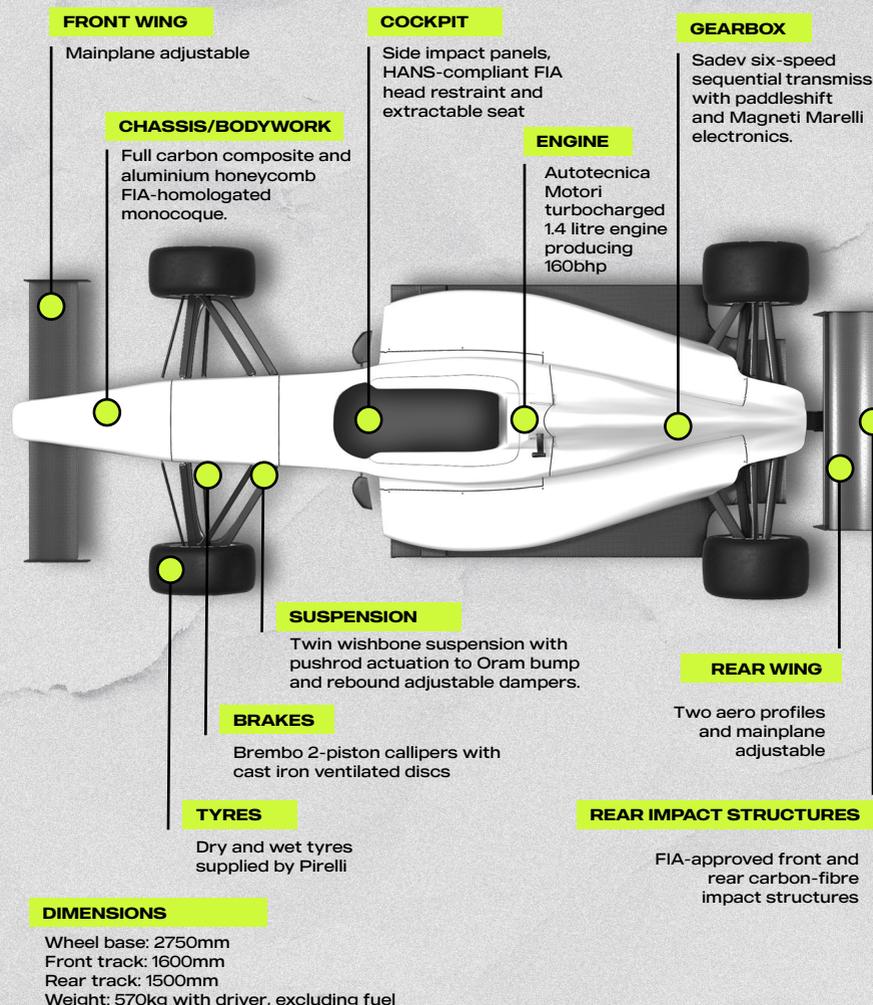

Every GB4 race will be live streamed on YouTube, as well as on the series' own platforms, making it incredibly easy for fans, sponsors and friends and family to follow all of the action.

The race weekend shows include pre-race build-ups and post-race analysis and offer followers of each championship more depth and detail, live from the track, than ever before. The live broadcasts will also feature special pre-recorded segments, adding more compelling context to the racing this season.

THE CAR

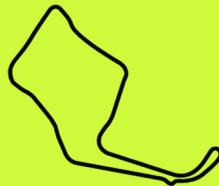

The popular Tatuus F4-T014 is used exclusively in the GB4 Championship, and with over 200 examples built since 2014, it is a well-known quantity for rising single seater stars to get to grips with. It's a junior 'slicks and wings' package as used widely across Europe, and is powered by the 160 BHP 1.4-litre turbocharged Autotecnica Motori engine.
